

Issues viewing Video Content

Due to recent browser security measure updates some online lecture video content may not be loading correctly in your browser, leaving you with a blank screen. If you experience this issue please follow the instructions below:

Internet Explorer:

You might receive this message as soon as you try to load blocked content using Internet Explorer. Click Show all content to continue to load content.

Chrome:

Select the shield visible in the address bar and select "Load Anyway" which loads the embedded content, it's a security step that chrome blocks without a dialogue box prompt.

Firefox:
